Subject: EPA causality study; in scope out of scope and potential candidate reviewers
Attachments: NASEM causality study - scope and candidate reviewers 2022-03-04.docx

Samm,

Attached please find a 1-page summary of broad in-scope and out-of-scope topics for the NASEM study on the ISA causal framework (TO *68HERC21F0010) as discussed on our call last week. Also included is a list of potential reviewers of the report. Steve and the other EPA team members are grateful for the opportunity to provide this information. Please don't hesitate let me know if you need anything else.

Best,
Dave
